Annual Indexes

Volume 8—October 1978 to July 1979

1. Subject Index

A

Adsorbed gases on phosphor in fluorescent lamps, Correlation between lumen output and 207
Arc lamps, Heat conservation system for 220
Alkali-rare earth vapor complexes and their application to HID arc lamps, Spectrophotometric study of 147
Alumina arc tubes, Electrolysis of sodium through 166
Arc instability in mercury and metal halide arc lamps 90
Arc tubes, Improved end seals for high-pressure sodium lamp 86

B

Ballasts, Nonlinear capacitors improve the performance of saturable lead . 122

C

Colorimetry, The basis for a new system of 155
Color rendering indices and shifts in Munsell space, Relationship between 226
Committee Reports
IES approved guide for the photometric and thermal testing of air cooled heat transfer luminaires . 57
IES approved method for life testing of general lighting incandescent filament lamps 152
IES guide for measurement of ultraviolet radiation from light sources 53
Convection in vertical mercury and metal halide arc lamps 126
CRF and ESI with a programmable hand calculator, A procedure for calculating the direct components of 19

D

Daylighting in interior spaces, On calculating the effects of 2
Discomfort glare: duration-intensity relationship 36
Discussions of previously published papers—October 1978 and January 1979 132

E

Electrolysis of sodium through alumina arc tubes 166
Electron emission materials for HID lamps, Improved 174
Energy conservation from lighting maintenance 195
ESI and visual performance methods, Procedure to determine background illuminance for use in 15
ESI meter in lighting applications, Using the 229
ESI with a programmable hand calculator, A procedure for calculating the direct components of CRF and ... 19

F

Fail-safe lamps, Oxidizable switch for 142
Fluorescent lamp, Impedance modified 179
Fluorescent lamps, Correlation between lumen output and adsorbed gases on phosphor in 207

G

Glare: duration-intensity relationship, Discomfort 36
Guide to methodology procedures for identifying subjective impressions in lighting 95

H

Heat conservation system for arc lamps 220
HID arc lamps, Spectrophotometric study of alkali-rare earth vapor complexes and their application to 147
HID lamps, Improved electron emission materials for 174
High-pressure sodium lamp arc tubes, Improved end seals for 86
High-pressure sodium lamp seals and recent improvements 72
HPS lamp seals: materials and structures, Properties and evaluation of 250

I

IERI Reports
A guide to methodology procedures for identifying subjective impressions in lighting 95
A note towards the understanding of lighting quality 111
Proofreading under different levels of illumination 47
IES approved guide for the photometric and thermal testing of air cooled heat transfer luminaires 57
IES approved method for life testing of general lighting incandescent filament lamps 152
IES guide for measurement of ultraviolet radiation from light sources .. 53
Illumination, Proofreading under different levels of 47
Impedance modified fluorescent lamp 179
Incandescent filament lamps, IES approved method for life testing of general lighting 152
Incandescent lamps, Thermochemical analysis of hydrogen, carbon and the water cycle in 66
Interior spaces, On calculating the effects of daylighting in 2

L

Lamp seals: materials and structures, Properties and evaluation of HPS 250
Lead ballasts, Nonlinear capacitors improve the performance of saturable 122
Lighting applications, Using the ESI meter in 229
Lighting maintenance, Energy conservation from 195
Lighting systems for Space Shuttle Orbiter and Spacelab 188
Life testing of general lighting incandescent lamps, IES approved method for 152
Light level variations and system performance, A procedure for qualitative study of 28
Light sources, IES guide for measurement of ultraviolet radiation from 53
Lumen output and adsorbed gases on phosphor in fluorescent lamps, Correlation between 207
Luminaires, IES approved guide for the photometric and thermal testing of air cooled heat transfer 57
Luminaires, New concepts in photometry of 162
Luminance for use in ESI and visual performance methods, Procedure to determine background 15

M

Matching lights, A simple picture of . 78
Materials and structures, Properties and evaluation of HPS lamp seals 250
Mercury and metal halide arc lamps, Arc instability in 90
Mercury and metal halide arc lamps, Convection in vertical 126
Metal halide arc lamps, Arc instability in mercury and 90
Metal halide arc lamps, Convection in vertical mercury and 126
Munsell space, Relationship between color rendering indices and shifts in 226

N

Nonlinear capacitors improve the performance of saturable lead ballasts 122

O

Oxidizable switch for fail-safe lamps 142

P

Phosphor in fluorescent lamps, Correlation between lumen output and adsorbed gases on 207
Photometric and thermal testing of air cooled heat transfer luminaires, IES guide for the 57
Photometry and spectroradiometry, Developments in high speed 214
Photometry of luminaires, New concepts in 162
Procedure for calculating the direct components of CRF and ESI with a programmable hand calculator, A . 19

Procedure for qualitative study of light level variations and system performance, A 28
Procedure to determine background luminance for use in ESI and visual performance methods 15
Procedures for identifying subjective impressions in lighting, A guide to methodology 95
Programmable hand calculator, A procedure for calculating the direct components of CRF and ESI with a 19
Proofreading under different levels of illumination 47

R

Roadway lighting, Design considerations for 40
Roadway lighting, Economic analysis of 244

S

Skylighting for industrial and office buildings, An economic analysis of supplemental 235
Sodium through alumina arc tubes, Electrolysis of 166
Spacelab, Lighting systems for Space Shuttle Orbiter and 188
Space shuttle orbiter and spacelab, Lighting systems for 188
Spectroradiometry, Developments in high speed photometry and spectroradiometry 214
Structures, Properties and evaluation of HPS lamp seals: materials and . 250
System performance, A procedure for qualitative study of light level variations and 28

T

Thermal testing of air cooled heat transfer luminaires, IES approved guide for the photometric and 57
Thermochemical analysis of hydrogen, carbon and the water cycle in incandescent lamps 66

U

Ultraviolet radiation from light sources, IES guide for measurement of 53
